Advance Care Planning

What is it?
Advance care planning involves making a plan for your future medical care. If one day you are too unwell to make decisions or communicate, your doctors can refer to your plan.

What will my GP do now?
Your GP has already discussed advance care planning with you. You will need to have a few talks with your GP about your wishes.

Legal Definitions
Advance Care Planning: The process of planning for your future health care if you are one day unable to make decisions or communicate.
Advance Care Directive: A legal document stating the treatment actions to take if you are not able to make decisions.
Palliative Care Plan: A resuscitation plan which is shared with NSW Ambulance.
Enduring Guardian or Person Responsible: Someone who makes medical decisions for you if you can't speak for yourself.

What can I do?
Continue to think about and write your plan. Make notes, speak to others, and chat with your GP about your options.
Your plan should include your:
- Values and life goals
- Wishes for your different future health scenarios
- Instructions about your care if a life-threatening illness or injury occurs
- Your Enduring Guardian or Person Responsible
When your plan is complete, you will need to share it with your GP. You should also share your plan with family, close friends and anyone else involved in your care or legal matters.
Remember: You can change or cancel your plan, goals or preferences at any time.
